WILL BUILD A LARGE RINK

Board of Trade Decide to
Have Largest Rink
in The Pass

HAD MEETING MONDAY

Rink Will be 150 Ft. Long

--Blairmore Has Many

Good Hockey Players

A meeting of the Blairmore Board of Trade was held in the union bank building on Monday evening last. The following members were present: W. A. Beebe, chairman, Archie McLeod, S. J. Sargeant, A. A. Sparks, T. Frayer, F. E. Hinds, J. Gaskett-Smith, T. B. George and J. R. Bradley.

The first business to come up before the board was regarding the publication of an article on Blairmore in a book recently published by a Calgary printing company and for the publication of which the said company desired payment. But the board refused to make any payment on account of the former not fulfilling their contract.

The next item of business was that of building a skating rink for Blairmore. This was a subject of much favorable comment and all the members were anxious for Blairmore to own a large skating rink. We have several good hockey players here and all that is needed now is a good place for them to use the puck. It was moved, seconded and unanimously carried that steps be taken at once for the erection of a skating rink to be sixty feet wide and one hundred and fifty feet long. This rink will be built at the corner of Fourth avenue and State street and work on same will commence at once so as to have it completed by the time winter sets in.

It was thought advisable to have notices put up in conspicuous places along certain portions of the roads east of Blairmore compelling automobiles to use only certain roads so as to make it less dangerous for people using horses along these roads.

Three applications for membership were read and accepted.

A communication from C. L. Barnbrick, who recently left Calgary, tendering his resignation as secretary, was read and accepted and T. B. George was elected to the office of Secretary. Several other communications of minor importance were read and ordered filed.

No more business, meeting closed at 10.30 p.m.

Service will be conducted at the Presbyterian church Sunday morning at 11 o'clock. Subject: "Loving wife." A special invitation is extended to young men.

Arthur J. Langlois, Pastor.

A large party of friends of W. J. Bartlett treated him to a well-planned-out surprise at the Entertainment office on Tuesday night. Ye sanctum, instead of being a place for manipulating the metal that sounds the newsy note, was converted into a cabin of cooking utensils, "jelly rings" and "flying angels."

WANTED—Reliable correspondents at Frank, Bellevue, Hillcrest, Passburg, Lundbreck and Cowley. Liberal offers to right persons. Write for particulars, etc., The BLAIRMORE ENTERPRISE.

Happenings in and Around Blair- more

J. Menard returned from Franco on Sunday last.

T. W. Davies was down from Coaman this week.

E. MacDonald, of the E. T. bank Coleman, spent Sunday in town.

A train of thirteen empty passenger cars went East on Monday.

G. C. Egg, representing the International Correspondence schools, was in town on Tuesday.

A. B. Hames left on Sunday last on a business trip to New Westminster and Vancouver.

Mr. and Mrs. W. C. Lyman went to Spokane on Saturday last. They returned to town on Wednesday.

W. L. Mison of Exshaw has accepted a position as book-keeper and accountant with the Rocky Mountain Cement Co.

J. W. Glenwright, the provincial manager for the Prudential Life Insurance Co., was down from Calgary this week doing business around Blairmore.

You cough, sneeze, you. Keep on hacking and tearing the delicate membranes of your throat if you wait to be smothered. But if you want relief, want to be cured take Chamberlain's Cough Remedy. Sold by dealers everywhere.

P. Burns & Co. have moved their old shop across the street opposite the old stand and will conduct their business there while the new building is being erected.

Smith and Hargreaves are putting on a big sale of some furniture and have already informed the people of The Pass of the fact by the distribution of hand bills.

Chamberlain's Cough Remedy has become famous for its cures of coughs, colds, croup and influenza. Try it when in need. It contains no harmful substance and affords almost prompt relief. Sold by dealers everywhere.

Rev. A. J. Langlois, who arrived in town on Thursday last to take charge of Presbyterian mission at this place and Lillie, delivered his first sermon to a Blairmore congregation on Sunday morning last.

The foundation for the new railway station is about completed and next week we shall see the frame rise. The "Old Soo" is beginning to feel nervous at the probability of losing her commission.

The "Passion Play" was very beautifully represented on the Mercantile Hall screen last week by the Clark Moving Picture and Vaudeville Company, and a large audience attended to witness these really fine pictures.

A. Paul who has had a photographing tent erected on main street during the past two weeks, was fined the sum of \$10 on Wednesday for doing work here without a license. He has since left for further West.

One of the best real estate deals put through in connection with Blairmore property for some time was that handled by Archie McLeod on Wednesday of this week when he sold to John S. MacEchran, of Morley, B. C., the lot east of Union bank on Victoria street, owned by A. A. Sparks, for the sum of \$3,000. It was a cash deal.

A water works of sufficient capacity to supply a city of twenty thousand people, one of the best opera houses in the Crow's Nest Pass and a skating rink larger than any other in The Pass are amongst the many things in store for Blairmore and which will be completed in the near future.

ARE WORKING ON WATER SYSTEM

Blairmore Water Works
Will be Completed by
December 1st

LOTS OF GOOD WATER

E. Morino, Sub-Contractor, Has Nearly 100 Men at Work

Work on the construction of the water works for Blairmore has commenced and already men are engaged excavating, laying pipes and building the dam. This work is being started about two miles south-west of the town, at York creek from where the water supply will be had.

W. J. Budd, the successful tenderer for the installation of the Blairmore water works, has awarded to E. Morino the sub-contract for all the excavating work, laying of pipes and the building of the dam, while the Dominion Wood Pipe Company, of New Westminster, B. C., has received the sub-contract to supply all the wire-wound wooden pipes required for the said water works.

E. Morino has about sixty men employed at present but he expects to increase this number to one hundred before the week closes. A large force of men will be kept on all the time and work will be rushed so as to have the water reach town early in December.

A large shipment of wire wound wooden pipes is expected from the coast this week. Twelve inch pipes will be laid from the dam to the town, ten inch pipes will be laid along the greater part of Victoria street while the water will be carried through eight inch pipes to the several other streets and avenues.

Messrs Woods and Steele, Dominion land surveyors, of Pincher Creek are at Blairmore protecting the town's interest in the construction of the water works. Messrs Woods and Steele propose opening an office here and placing a competent man in charge so as to enable them to attend to their extensive work at other places.

THE SISTER.

She Made Life Worth Living For
the Reckless One.

By F. B. WRIGHT.

"Are you going to answer my question? Won't you take me with you?"

Clifford Vane turned with surprise as he heard the voice. A girl with deep brown eyes and hair in which there was a hint of gold was standing beside the boat, her hands pressed against her slender figure. The fluttering sail had blown so much noise that Vane had not heard the girl before. He frowned unconsciously, for he was in no humor for company.

"It's too rough today. There's a nasty sea running, and you'll get wet through," he answered.

"As if I cared for that! And if it's so rough why do you venture out?"

"Because I want to, because it suits my mood."

The words sounded rude, but Marjorie Winthrop knew from the latest expression on Vane's face that he gazed out on the black clouds, the sullen green water of the bay and the wind-blown whitecaps that he was speaking more to himself than to her.

"And if I suit my mood?"

"You with words, child?" Vane said wonderingly. "What can you know of thoughts? Black enough to suit with such a day? Go back to your dolls or read your pretty fairy love stories and believe in their truth as long as you can," he added bitterly.

"You think because I'm only seventeen I'm not to feel and think?"

"Think only of pleasant things."

"But if the day suits me it's pleasant. I please take me."

"What will your mother say?"

"She won't care. I'm the daughter of Edith. If it was Edith, now, it would be different, but I'm not such a valuable cargo. No one will bother about me."

There was a quiver in the girl's voice that made Vane look at her. She was looking out over the yasty water with misty eyes and downy lips.

"All right," said Vane after a moment's hesitation. "I'm in a reckless mood. Let fate take care of us. What will be, will be. Jump in."

It was a gusty day, and the boat, too light for such weather, her lee rail almost under water, staggered under the waves, every now and then lurching her nose into the rollers and sending a shower of spray into the boat. Vane and all he could do to manage her and for a time forgot his companion and almost his gloomy thoughts in the almost pleasure of his contest with wind

Winthrop was just thinking of the woman who had led him out to love her and then thrown him over for another man. Edith did not care. Every one must be sacrificed for the sake of love—yes, even this child, her sister. At the thought he glanced at the girl who sat poised out to windward, the soft spirit of the sea blowing in the wind, her cheeks aglow with excitement, her eyes fixed with a faraway look on the horizon. Vane had never noticed how pretty she was before. He had always thought of her as a mere child, and, so, she was a woman. What was she thinking of? he wondered.

As if in answer to the question Marjorie turned and met his eyes for an instant and then looked away.

"You've heard of Edith's engagement?" she said.

"Yes," answered Vane, setting his teeth hard. "I found it out only to-day."

"I knew it weeks ago. You thought she cared for you?"

"Yes."

"You might have known she didn't. Van Alstyne is a richer man than you—in money. It's wealth and power she wants, and attention and admiration. Love? She doesn't know what it means. And you thought she had a heart?" cried the girl. "This sea has none."

"I know it now," said Vane, "when it's too late."

"And you—can you care for her still?" asked Marjorie after a silence.

"Yes—at least I care for the ideal I thought her."

"What did you think her?"

"Brave, courageous, noble-hearted, with a soul as beautiful as her body, a comrade for a man, to face with him the storms of life, a woman tender and true, to fight for me and dare for I would have tried to give her everything I wanted. No man can love her as I do—and none."

"Vane laughed bitterly as an ending to his sentence.

"Why did you come out today in this gale?" said Marjorie. "Is your life so worthless to you that you would risk it because a thoughtless woman has wounded you?"

"My life? What does that matter? I don't care."

"If thought you didn't," returned the girl gravely. "I knew you didn't. That's why I came. I couldn't let you come alone."

"And you came because you thought?"

"You would be reckless? Yes."

"No. Why should I be? I knew you would take care of me—if not of yourself. The girl smiled at him confidently. "I am perfectly safe with you," she added.

So Marjorie had risked her life for him so that in the desperate humor he should not go alone. But how came she, a mere child, to understand that, at least, had a heart to make some man happy. And here he was putting her life at the mercy of the sea to

gratify his selfish mood of bitterness. Well, he must get her home at once—Vane thought he did not much care what happened after that.

It was blowing harder as Vane came about, and whacked the sheet for the time to the far distant battens and the boat on the water was going before the wind now, the boat rolling dangerously in the churning of the sea, the waves heaving following with hungry jaws and threatening every moment to engulf them.

With breast body and strained muscles, every sense alert, Vane gripped the tiller, striving to hold the boat against the swirling buffets of the waves, his eye sought to get her safe to land. Every moment the wind increased, every moment the bay became more tumultuous. Would they make it? he wondered.

They were nearly opposite the boat-house when there came a sudden whirl of wind from between the hills ahead. Vane had but time to cry a warning when the sail jibbed, the boom came swinging over with an angry snarl, the boat was flung upon her beam ends, and the next moment he found himself entangled in cordage and heaving

With his life behind him and with desperate fingers he cleared himself and came to the surface. And Marjorie—where was she? Had she been struck by the boom and made unconscious or killed—or had she, too, been carried down by the sinking boat?

For an agonizing moment Vane could see no sign of her, and then he spied her just coming to the surface. She was floating down again when he caught sight of her for the second time. It was a long swim against a tide that seemed to drag him down as if with clutching hands, but Vane as sure he would save this girl who had never saved his life for him or to his own. He could see people running to the boat-house now and getting out the boat. How slow they moved! Would they never find the

muscles were giving out; his breath came heavily; his limbs felt like lead. Could he hold out? They were wearying fast now. He tried to revive his falling strength, to overmaster his weakness. The world grew black before him, and then a strong arm gripped his shoulder, and he and Marjorie were lifted into the boat and rowed to shore.

In three days afterward, when Marjorie hovered between life and death, Clifford Vane learned how much he could do for this girl, this girl he thought was child and new creature, but the woman in all the world for him. Gone was his love for Edith Winthrop. He knew now that he had in her sister the best and the truest of women.

And there came a day when he was permitted to see her.

He found her on an upper piazza of the hotel clad in a blue wrapper, her soft hair loose on her shoulders, and his smile that he had never

had found happiness.

The English Soldier.

In Wellington's day death was the almost inevitable punishment of the soldier who deserted in time of war, while even in peace time such atrocious sentences as 1,000 lashes with the "cat," were by no means infrequently inflicted. Yet in spite of this desertion was far more prevalent than it now is, for enlistment then was for life, and a man could not leave his regiment without being shot.

The soldier was well fed and well cared for, and he did not desert, at all events, for a great extent. He stood absent without leave, he "kipped out" of one regiment in order to join some other he liked better, he rejoined the colors from the reserve under an assumed name, and so on, but these things, although reprehensible enough in themselves, fall short of desertion as popularly understood, although some of them are officially classed as such. Actual out and desertion is, in fact, the rarest of army crimes nowadays. —London, T. N. S.

He Knew the Requirements.

Uclei Silas in his youth had been "fond of the society of the opposite sex," to use his own words, and the timidity of his twenty-three-year-old nephew was a great trial to him.

"What's the matter of you, Rod, that you stick at home Sunday evenings?" he demanded plaintively after many unavailing hints. "Why don't you go calling on some of your young lady friends, boy?"

"Oh, I don't care about it," said Rodney, turning a lively crimson. "He wouldn't find me interesting."

"Wouldn't?" puffed Uclei Silas. "Well, I should like to be told why they wouldn't. You've got a good black suit and a new hat, and you've got a pair of legs that could take you to the county shop on Sunday night and enough pockets to put a box or two in. I should like to know what more you need to make 'em and you interesting." —Youth's Companion.

The Great Advantage.

The preacher is usually no doubt the last man to recognize the sermon as the church's staple. But one worthy Scotsman, Dr. Robert Henry, author of the "History of Great Britain Written on a New Plan," showed by a story that he did. He shared a charge with Dr. Macknight, whose dulness in the pulpit was appalling, and Dr. Henry, turning a lively crimson, said he would not have attracted congregations. One day he dwelt, with remarkable emphasis, to his colleague on the blessing it was that there were two of them in the Kirk, and Macknight, courteously acknowledging the advantage to himself, said he did not see how it benefited the church. —Youth's Companion.

Not His Experience.

Mr. Henpeck—Let me see—is it "bugmat" or "polygamist"?

Mr. Henpeck—What are you talking about?

Mr. Henpeck—Why, a man who has one wife too many is a "bugmat," isn't he?

Mr. Henpeck—Not necessarily.

Called on His Wife.

Herbert Tremblay, who escaped from Hobart (Tasmania) last recently, returned to the lock-up next day, saying he only wanted "to see the missus."

Compensating Hotels.

During the last three years 30 hotels in Victoria have closed the compensation amounting to \$750,000, the whole of which was borne by the trade.

THE ENGLISH SUNDAY.

Very Few Londoners Go to the Church Services.

Time was when the London Sunday was traditionally a day of observance. The staid and respectable British subject attended church services and elsewhere shut himself in his castle and he banged down the portières, his friend nor foe might enter there. Hospitality could cheer the rest of the world. But that day was over.

It is changed. Church attendance in the great metropolis has declined. Rev. Dr. R. E. Horton, speaking in a chapel at Hampstead, declared that "unless God arrests the habit of our people" the congregations may continue to decrease. One lamentable result is a stagnant decrease, by comparison between a Sunday in 1903 and a recent Sunday, in church collection London from \$250,000 to \$200,000, a fall of 20 per cent.

But, after all, this financial aspect of the case is not so serious as that statement would seem to indicate. The prosperous who choose to seek their recreation in the open country do not forget that the greatest of these is charity. On a great many occasions, with their various stations of the Metropolitan and District ways, and of the "tubers" and rapers, a plentiful harvest of gold and copper from thousands of contributions to hospital funds, outside the churches, have also met with generous response.

It appears that there is no need in all this for evangelized gloom. Even at the present time, not more than one-third of the population of London attend church that fraction may be all of those who seek the opportunity to seek suburban joys on that day are thereby lacking in reverence. They are thereby lacking in reverence. They are thereby lacking in reverence. They are thereby lacking in reverence.

St. Isidore, P.O., Aug. 18, 1904.

MINARD'S LINIMENT CO., Limited.

Gentlemen—I have frequently used MINARD'S LINIMENT and also prescribed it for my patients always with the most gratifying results, and I consider it the best all-round Liniment extant.

Yours truly,

DR. JOS. AUG. SIROIS.

There are millions of packets of Wilson's Fly Paste sold every year, and every day will kill every fly that drinks the poisoned liquid from it.

Perhaps time is money because it manages to slip away so fast.

An ideal woman is one who succeeds in concealing her imperfections.

Mr. Henpeck—"You, Charles, what's that noise down there?"

Mr. Henpeck—"I trust, my dear, that I may fall down the cellar stairs if I wish to."

Still Knocking.

Mrs. Stubbs—"John, this health magazine states that more bachelors take Turkish baths than married men."

Mr. Stubbs (smiling)—"Well, that's nothing extraordinary. I know, you know that there's lots of married men whose wives keep them in 'hot water' all the time."

She (horror-stricken)—"That's my husband! He's in the chair there, isn't he?"

He (meekly)—"I'm sitting on the sofa, Mary."

A well-known barrister, although possessed of a suave voice and a stately manner, nevertheless had a way of bearing down the foe with almost savage wit. Once in court, he had to follow counsel for the prosecution, who had delivered his remarks in very soft tones. "Now that the notes in court has subsided," murmured the barrister, "I will tell your lordship in two sentences, the gist of the case."

An Oil That is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its great name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far-abled-mouth to attest its excellence, for in all these countries it is on sale and in demand.

"Miss Giddy," began Mr. Timmid, "I thought to propose—"

"Really?" interrupted Miss Giddy. "I'm sorry, but—"

"That we have some ice-cream—"

"Oh, I should be delighted to take—"

"Some other evening when the weather is warmer."

A Slight Burden.

He—Yes, I think a great deal of myself.

She—I've noticed that you never seem to have much on your mind.

Minard's Liniment Cures Dandruff.

"Is it true that Piker is financially embarrassed?"

"He is awfully in debt but it does not seem to embarrass him at all."

In thirty years there has never been one of Wilson's Fly Paste sent out that would not kill flies in immense quantities, if in the first place the flies were in the house, and if the housekeeper followed the directions and got them to the Paste.

Her Father—Blanche, why doesn't Mr. Linger go home earlier?

Blanche—I'm why, dad.

When going away from home, or at any change of habitation, he is a wise man who mingles or rubs his belongings with a bottle of Dr. J. D. Kellogg's Dysentery Cordial. Change of food and water in some strange place where there are no doctors may bring on an attack of dysentery. He then has a stomach remedy at hand with which to cope with the disorder, and forearmed he can successfully fight the ailment and subdue it.

"Well, thank goodness you've never sent me run after people who have money!"

"No; but I've seen people run after you because you didn't have money."

DR. MORSE'S INDIAN ROOT PILLS

cure many common ailments, which are very different, but which all arise from the same cause—a system clogged with indigestion. The Pills cause the bowels to move regularly, strengthen and stimulate the kidneys, and open up the pores of the skin. These organs immediately throw off the accumulated impurities, and Biliousness, Indigestion, Liver Complaint, Kidney Troubles, Headaches, Rheumatism and similar ailments vanish.

Dr. Morse's Indian Root Pills SAVE DOCTORS' BILLS

THE MOST HUMAN PICTURE EVER PAINTED

"THE DOCTOR"

A photographic reproduction of this great painting, 22x28 inches in size—the largest photograph ever printed. PRICE 25c. POSTAGE PREPAID.

The original of this great painting, by Luke Fildes, hangs in the Tate Gallery, in London, placed there by popular subscription. Never has a brush depicted more powerfully the expressions of professional ability, maternal grief, fatherly hopefulness or childish helplessness. It is really as well as figuratively the most human of all the world's great works of art.

Newspaper enterprises, lacking modern mechanical progress, makes it possible to put this work of art into the hands of the public at this nominal cost.

THE ART STORE PRICE OF THIS PICTURE WOULD BE \$250.

PICTORIAL PRESS, Toronto, Winnipeg.

Blairmore, Alberta, Thursday, Oct. 6, 1910

A CorrectionThe report which appeared in
last Friday's issue of the Leth-
bridge Daily Herald which said
that the coal mines at Coleman,
Blairmore and Frank were only
working half time on account of
scarcity of orders, is not correct
and appears to have been written
by some member of the Ananias
club for the purpose of doing in-
jury to this famous coal mining
district.The article in question is as fol-
lows:—"Blairmore, Sept. 29.—The
coal mines at Coleman, Blairmore
and Frank are at present working
half time, scarcity of orders being
accounted the cause." Could a
more fallacious statement be made?
Could a more direct falsehood be
concocted? Could a report that
would be more damaging to these
famous coal mines be published?
And could a more counterfeited
article be forced upon the public?

Naturally the question arises:—

"Who wrote that fabulous article?"

Did the person have a defective

mind or was he on his "usual

drunk"? Was it written by some

traveller while passing through on

the train? or was it written by

some person who had been neglect-

ful with his work while in the

employ of one of the coal compan-

ies and was fired and who hoped to

this way to get revenge?

To show what a falsifier the

writer to the Lethbridge paper is,

we will give a few facts. During

the first two weeks in September

the International Coal & Coke Co.
at Coleman, mined 25,285 tons of

coal. And although this was a

record breaker for that company,

they were even then unable to

supply the orders for their coal.

The last two weeks in September

this company, on account of scar-

city of orders, and not "scarcity of

orders," mined but 10,735 tons.

Notwithstanding the immense out-

put of coal by the International

Coal & Coke Co., they have not yet

been able to supply the demand

for their product. The mines of this

company were not idle on account

of scarcity of orders but because of

car shortage.

The McGillivray Creek Coal &

Coke Co. at Carbonade (near Cole-

man), are working their mines full

time and find that the demand for

their coal is greater than the out-

put.

The West Canadian Collieries,
with mines at Blairmore, Lilloe and

Bellevue, receive more orders every

day than they can possibly fill.

The mines at the two latter places

have been working full time. The

Blairmore mines have never been

idle for the want of markets for the

coal but have been closed only

when cars have not been obtain-

able. The orders for the Blair-

more coal are increasing every day

and it would indeed be poor

business policy if a coal company
with such a demand for its prod-uct as that of the West Canadian
Collieries were to work only halftime when all the railway cars
necessary were at their demand.The Canadian Coal Consolidated
Co., at Frank, also state that the
report saying that their mines were
closed last week or any time re-cently because of the scarcity of
orders is a direct falsehood and
they cannot understand what
prompted any person to make such

a damaging statement.

We have always considered the
Lethbridge Herald to be a reliable
newspaper and we would not for
one moment have our readers
think that if the editor of that
paper had known that the matter
referred to above was incorrect, he
would have published the said
article in his paper. It was evident-
ly written by an unreliable person,
or one who desired to damage the
reputation of our coal mines or a
person who is inexperienced in
newspaper work and who does not
know the value of telling the truth,
or one who has a passionate desire
for "fery water" and has an un-
balanced mind.**Socialism and****Christianity**In denouncing the contention of
Rev. Dr. Chown, general superinten-
dent of the Canadian Methodist
Church, Messrs. Bartlett, the Canadian
Socialist organizer, writes the Toron-
to Globe thus: "Would you
permit me as the accredited or-
ganizer for the Socialist party
of Canada for the Province of
Ontario to give a repudiation to the
statement of the Rev. Dr. Chown
that 'Socialism is founded upon the
teachings of Jesus.' The Socialist
position is founded upon science,
both sociological and economic. As
such, it is opposed to all religions,
which we maintain were professed
in given social conditions. With
the establishment of a Socialist regime,
Christianity, Judaism and all super-
natural ideas clinging to mankind
will be abolished. The Socialist
party of Canada is opposed to the
unscientific worship of Christ, Bud-
dha, or Mahomet. We do not believe
in the salvation of the Church. We
oppose that idea. It is far better
to have the people understand this now
than let the confusion exist or let it
be disseminated in the pulpit. Social-
ists cannot believe in any super-
natural God. If they do they are
not Socialists. The pamphlets issued
by the Socialist party of Great Britain
on 'Socialism and Religion' is the
only attitude we can take up.The Church will find in us their
annihilating foe. Christianity, with
its superstitions, must be submerged
if the workers obtain their com-
plete emancipation. That is our
program. That is our challenge. Far
better let it be known now and so
avoid misconception in the future.
Finally, a Christian cannot be a
Socialist, and a Socialist cannot be a
believer in Christ or God."The title says: We can hardly
believe that the organizer of the
Socialist party of Canada speaks with
any authority on this matter. If he
does, and the Socialist party is avowedly
anti-Christian, there is need for
vigorous action on the part of the
Churches in the direction of combat-
ing its progress. Many of the lead-
ers of the Socialist movement are
Christians in the best use of the word.
Karl H. H. says that he first
learned his Socialism in the New
Testament, where he still finds his
chief inspiration. Between Karl Har-
dis and Messrs. Bartlett there is a great
gulf. On which side of it does the
Canadian Socialist party stand?Lethbridge Sons of England
lodge, Erbe of Alberta, were the
happy winners of the silver
banner awarded by the Su-
preme Lodge for the largest net
gain in membership during
last year. Lethbridge S. O. E. is
enthusiasm to the core.**A Few "Didn't's"**The "knockers" didn't succeed in
changing the position for the new
Blairmore railway station. No, they
didn't. Now the good work goes on.A couple were to be married at
Frank on Saturday night last, but
because of another girl "baiting in"
they didn't. "Baiting in" don't pay.Those of us who want to see this
town rise are reluctant in our praise
of the driver's handling him. We
could treat "knockers" back in their
own coin, but as yet we didn't.Some prophesied that the advent
of Hally's contest some few months
ago would be followed by earth-
quakes, scourges, calamities, wed-
dings and such and that this whole
earth would dwindle as small as the
ideas of some unworthy citizens, but
it didn't.**Blairmore Hotel**

Coleman Notes

Alex. McLean left on Sunday

night for Blairmore.

E. MacDonald was out of town

on Sunday, visiting Blairmore,

Frank, Lilloe and several other

places along The Pass.

W. J. Bartlett straddled from

Blairmore to Coleman on Tuesday

night and reported frizzly snow in

the higher altitude.

J. B. Harmer has resigned his

position with the Coleman Miner

and Slayok Canada and has fare-

well to his fellow professionalist

here on Saturday last. He will

probably take up a permanent

residence in Blairmore.

The action of some in nominat-

ing a second man for mayor to

oppose Alex Cameron was rather a

huge joke on the man on the hill

or a direct insult to Mr. Cameron

who has done so much towards

making Coleman what she is to-

day.

Many people of this place are

very indignant over the report

sent out to the Lethbridge Herald,

last week, to the effect that the

coal mines at Coleman were only

working half time on account of

scarcity of orders. Although the

amount mined is about 2,000 tons

a day, the demand is still greater

than the output. It is true that

the mines were idle about half

time last week but it was on ac-

count of car shortage. We hope

that the individual who wrote that

article will sober up before he

attempts to write anything else

about this part of the district.

The meeting held in the Miners
Hall on Monday night in the interest
of the municipal election was largely
attended. On the platform were
the following speakers, comprising
the old and new arena, whose ad-
dresses were given in like order: D.
Hyslop and Alex. Cameron, for mayors;
J. O. C. MacDonald, J. Clark, Tom
Steele, H. James, W. Evans, Alex.
Morrison and T. B. Brandon, for
councillors. The principal text of
the meeting was the matter of taxes,
the levying of which did not appear
to be in a way satisfactory to all
classes, and the bluff and water sup-
ply. Mr. Cameron very ably brought
out his points in the different sub-
jects and was repeatedly applauded
by his numerous supporters, so that
it was easy to see in which direction
the vote would lean. Mr. Steele
held the large audience spell bound
and rapt—in fact too many rap-
id. Among the audience of two hundred
and fifty were one hundred and
eighty male adherents and converts
to the policy of the old reliable, and
thirty male and forty female sup-
porters of the new arena.

PEPPED THE LION

A Contest Between Human and Brute Strength.

SANDOW WAS THE VICTOR.

Stripped to the Waist, the Strong Man Wrestled With the Enraged Animal, Who Was Mitten and Muzzled, and Thoroughly Subdued Him.

The story that Richard, later termed "Coeur de Lion," derived his name from the feat of tearing a lion's heart out of its body is finally regarded today as an apocryphal. At this distance of time it is impossible to tell what was the truth. But if it had and had the strength of Sandow and drove with the lion under conditions similar to those under which Sandow wrestled with a man in his famous "Prize Fight" in San Francisco some years ago, there may be a basis of fact for the legend. In the Strand Magazine, Mr. Sandow, of the event.

It was to be a struggle between brute strength and human strength. Merely in order to prevent the lion from tearing the lion to pieces with its claws, man's teeth were to be placed on his feet and a muzzle over his head. The lion, I must tell you, was a particularly fierce animal and only a week before had enjoyed a dish that was not on the menu of the house.

Well, the engagement was accordingly made and "A Lion Fight with Sandow" widely advertised. The announcement, I am told, was a thrill through the cities for a hundred miles round, and in order to be equipped for a performance which would be found to attract hundreds of thousands of people I decided to rehearse my fight with the lion beforehand.

I had it in my mind that the effect of attacking and muzzling the lion might be to put him off the fight by frightening him, and, realizing how foolish I should appear facing a lion that would not fight, I was desirous of making certain that this should not be the case.

Accordingly the lion was muzzled and muzzled, but only with the aid of six strong men, and I entered the cage muzzled and stripped to the waist. What happened was in direct opposition to my expectations; he began his paws and tearing his head in a wire cage only served to enrage the brute, and no sooner was the lion muzzled than he crouched preparatory to springing upon me.

His eyes ablaze with fury, he hurled himself through the air, and, as I had time to stop, and before he had time to recover I caught him with my left arm, and with my right hand round the middle with my right arm, although his weight was 350 pounds, I lifted him as high as my shoulder, gave him a huge hug to indicate to him that he must respect me and tossed him to the floor.

Roaring with rage, the beast rushed directly toward me and raised his huge paw to strike a heavy blow upon my head. As his paw cut through space I felt the air fairly whistle and realized not only my lucky escape, but the lion's weak point and my strong one.

If only he struck me once I knew it would be my corner and I was particularly sure that he never should. As I ducked my head to avoid the blow I succeeded in getting a good grip round the lion's body with my chest, touching his and his feet over my shoulders and hugged him with all my strength. The lion was scratched and tore the harder I hugged him, but although his feet were protected by mittens, his claws tore through my mittens and put me in a bad way, but he was in a worse way than I was.

Before leaving the cage, however, I was determined to try just one other feat. Moving away from the lion, I stood with my back toward him, thus exposing his back to my hands, and then, lifting him to jump on me. As once he sprang on my back.

Throwing up my arms, I gripped his head, then caught him firmly by the neck, and in one moment shot him clean over my head, landed by the animal's own impetus, and launched him before me like a sack of sand, the action causing him to turn a complete somersault.

While he lay there, dazed, the door was unlocked, and I went out, my legs and neck bleeding and with scratches all over my body. But for these trifles I cared nothing. I felt that I had conquered that lion and that I had a little difficulty in mastering it on the next occasion to public.

So thoroughly was he tamed, however, that the next day I was able to show him to the public for two minutes. When he would fight no more I lifted him up and walked round the arena with him on my shoulders, he remaining as firm as a rock and as quiet as an old sheep.

Different Style.
Edward, aged six, was sent to a barber shop to get his hair cut. The barber who was assigned to the job had red hair.

"Would you like to have your hair cut like mine?" asked the barber.
"No, sir," answered Edward. "Cut it some other color, please," said the boy.

Poor Service.
As the fire truck was being along the street car tracks Uncle Ben stood at the corner and waved his hat. "Ding it!" he exclaimed when the truck had passed. "That wouldn't stop neither!"—Buffalo Express.

MYSTERIOUS JIM.

He turned up kind of sudden-like. Came in a walk-in on the place. He had all eyes on him. He was a comical figure. He came from Toronto to land here.

He took his meals with Tommy Clark. An' every day he had his meals. With any look at all, he was a comical figure. He came from Toronto to land here.

Some look delight in givin' him. An' he had a good deal of fun. He was a comical figure. He came from Toronto to land here.

They searched their man and found the goods. That him that had the goods. He was a comical figure. He came from Toronto to land here.

They were he shouldn't ride a stop. An' both them vicious was kept. For there they left a letter. He was a comical figure. He came from Toronto to land here.

Wanted Politeness.
"Won't you have my seat, madam?" he asked politely as he got up.

"No, thank you," she replied. "I prefer to hang to a strap."
"But I insist," he replied.

"My dear lady, I could not permit you to do so. I should not feel at all comfortable sitting here while you are hanging to that strap."
"Don't let it bother you for a moment, I implore you."

"Ah, you are very kind to say that, but I will insist on giving you my place. I, if you will pardon me, for saying so, am not one of those who can be invariable of the country that is due to the ladies. I come of southern stock. Please take my seat."

"Oh, behave!" if you must know it, I am wearing a new corset and could not sit down if I wished to.—Chicago Record-Herald.

Literary Housekeeping.
She laid down her pencil and went into the room to rearrange her hair. He hunted through the desk, and found a manuscript upon which she was working, and by which she hoped to achieve immortality.

"She opened the room with a quick glance," he read. Then, picking up the pencil, he added:
"Ah, if she would only sweep our room with an ordinary broom once in a while!"

"But this passage did not appear in the completed narrative."—Brooklyn Life.

Plea For Time.
"Can't you wait a moment?" he asked, looking at his watch. "I am a little late for my appointment."

Can't Cook to Missionary.
Harris was anything to say before you are served.
"Missionary—I'd like to talk with you for awhile on the virtue of a vegetarian diet."

A Cheap Cow.
Stranger—How do you value your white cow?
Farmer—Farrow—She ain't worth over \$10. Tasting cows this year?

Fiction.
Church—What does your friend do for a living?
"He's a writer of fiction."

Quite True.
Critic—See the ladybug on the dresser.
Archie—That's not a ladybug. Ladybugs never go into young gentlemen's rooms.

Decalogue.
"When a woman marries and two divorces her husband, I'd like to know what you call it?"
"Taking his name in vain."—Prince of Wales.

LOWER CALIFORNIA FISH.

Barbecued, rock cod, salmon, white bass, rock bass, mackerel, white fish and other varieties are sold to abundance in the waters of Lower California.

The Piousness Poppy.
In Turkey if a man is seen in the neighborhood of a poppy field and the wind blows from the field toward him he becomes unconscious, and would die if the country people, who are not acquainted with the circumstances, did not bring him to a well or stream and empty pitcher after pitcher of water on his face and body.

Wooden Heels.
The so called "French" heels for women's shoes are made by means of birch wood that has been seasoned at least two years.

Missouri's Lead Mines.
The lead mines of Missouri, which have yielded tens of millions of dollars and are not yet half worked out, are not only rich in lead but also in silver. For each ton of lead a ton of silver is produced.

Safest Place to Ride in a Train.
The safest place to ride in a railroad train is in the middle of the middle car. The danger of being injured in fire or collisions or side swipes is minimized. This is old, but it will keep repeating.

Camel Caravans.
Nearly 60,000 camels are used in the caravan trade between India and Persia. They are used to carry goods and passengers across the desert.

"8 5 8."
The American wireless signal of distress, "8 5 8," was adopted because of its ease of use and quick recognition. Three dots, three dashes and three dots.

Light of the Sun.
The sun gives 60,000 times as much light as the full moon. 1,000,000 times as much as the brightest star in the sky and 30,000,000 times as much as all the combined stars of the heavens.

How Greeley Learned to Read.
By a singular adaptation to the changes of motion on his mother's part while speaking Horace Greeley when a young boy acquired the unworldly quality of reading with the book in front of him, and by which he was able to achieve immortality.

Malaria.
Within the last two centuries about fifty malarial have been discovered by chemists, explorers, but use has been found for only a few of them.

Franks of Lightning.
Lightning has struck, plucked feathers from the back of chickens and, better than some cooks, roasted them to a proper turn for the table. It has roasted apples on the tree and on the walls and has struck cooler and potter wheels and cooked the coolers and tubers in the very ground.

Panama River Windbreaks.
For raising oranges of great profit in Panama the windbreaks are absolutely necessary. If the grove is exposed to the trade winds, which blow continuously for nine months and which cripple unprotected trees.

Pyramid of Cheops.
Van an modern skyscrapers are not one bit as tall as the pyramid of Cheops. The pyramid is 480 feet high and its base is 750 feet wide. It is made of solid blocks of stone.

Liquid Air.
If liquid air be frozen to the consistency of which a strong magnet suspended over it will withdraw the liquid oxygen, leaving the nitrogen, a jelly mass, in a vessel.

The Alexandrian Library.
The library at Alexandria suffered plundering on various occasions, but it remained practically intact until A. D. 480, when it was destroyed by the emperor Theodosius. The library was one of the greatest of the world.

The Adirondack Plateau.
The area of the Adirondack plateau is about 20,000 square miles, although there are many peaks that are over a mile high.

A Costly Prayer Book.
Queen Elizabeth used to carry about with her a book of prayer called "The Golden Mass." It was a book of 300 pages bound in "hammered virgin gold." One side of this costly volume gave a representation of the Judgment of Solomon; the other the broken sword of Solomon.

Galileo's Telescope.
Galileo's telescope, by which he discovered the satellites of Jupiter in January, 1610, is carefully preserved in the Museum of Physics and Natural History in Florence. It is the first practical telescope made.

A DARK OUTLOOK.

When the Sky Will Be Obscured by a Cloud of Arsenic.

The already ominous but not the inevitable loss of the sky—the chief physical fear of mankind, indeed, but the traveler's nightmare. In the few years that remain before aviation is an accomplished commonplace of our lives it is literally looking its last on the sky. All too soon it will be impossible even for a rich man to enjoy the peace which is mine this afternoon as in the heart of an old world I lie upon the fern and contemplate the mystery of the boundless sky.

Soon that fearful infinite will be feverishly alive to war and eye with all the turmoil and vulgarity of any other earthly thoroughfare. Rottidge will be utterly and forever destroyed, and warred town, tired folk that had been used to see into the country to rest their eyes and feed their nerves on tranquil spaces may as well remain in the city and wait until all turn their eyes on us which will be a very suggestive of peace as Broadway at noon.

All the old peace and prayer of the world will have gone. The six, once pure and tranquil, will be filled with the sound of pumps, the flash of signals and undreamed-of forms of noise and color. Men will have piled a cloud of gigantic smoke between them and the infinite, and, however high they may ascend in the wildest air, never will they be able to see the sky that blessed him with his blue peace, his beautiful old dreams of better worlds and fantastic fairy tales and even and hold the comforting hand of the eternal upon his troubled human heart. It is the end of the world as we know it.

BURBANK THE GRAFTER.
A Number of Long Felt Wants With Which He Might Well Be Satisfied.

Long Burbank, the friend of plant life, has it seems, perfected a new poppy of titanic dimensions and brilliantly variegated coloring, together with a number of other plants and flowers. He has proved that he can do almost anything with plants and flowers. It has been suggested that he might devote his attention to the production of a bachelor's button that can be sewed on so that it won't come off and a seagull to go with it.

Other folk want Burbank to devise a mushroom that will yield a superior grade of mush, and they hope that he will be able to produce a plant that will contain lemonade, just as some varieties of cactus are reservoirs of water. They are sure that he will be able to produce a plant that will yield a superior grade of mush, and they hope that he will be able to produce a plant that will contain lemonade, just as some varieties of cactus are reservoirs of water.

First Printed Almanac.
The first printed almanac was "The Prædicator Almanac," issued at Vienna in 1457 by an astronomer named Purbach.

Parasitic Flowers.
Curious ectoparasites resembling mushrooms grow on trees in Florida and Fargo. These are found to be a parasitic growth, but the "flowers" consist of the inner wood of the tree, which is forced through the bark and assumes various fantastic shapes, often those of the classical arabesque, even on Cortadilla capitals.

New Brunswick Forests.
New Brunswick has about 8,000,000 acres of fir, spruce and pine.

Milk to Let.
English is badly misused at times on the continent of Europe. One sign in Vienna, Italy, reads, "Dinner—Wine Included," and another "Milk For Sale or Let."

London and Fish.
It is estimated that every inhabitant of London eats half a pound of fish daily. The city has its fishing fleet of forty-six vessels, some of which go as far as the coast of Morocco, sixty miles away.

Salmon Skin Leather.
The inhabitants of the eastern coast of the middle of Asia clothe themselves with the tanned skins of the salmon. It is asserted that it makes a leather as tough as wash leather.

The Game and the Candle.
Many expressions now in everyday use have originated among the card tables, and the game has not worth the candle. It is asserted that it makes a leather as tough as wash leather.

Ultramarine.
Ultramarine is now furnished by chemistry. It is a deep blue color, and is used in the form of lapis lazuli in the days of Liebig it was dearer than gold.

For the Children

Boy Horseman Who Took a Long Ride.

Johnnie Watt was ignored. Without Watt's name was said to have been "My country, oh, how I love my country." Watt's name was said to have been "My country, oh, how I love my country." Watt's name was said to have been "My country, oh, how I love my country."

Colors in Cottons.
A good mixture to set color in cotton materials is one tablespoonful of turpentine, a handful of salt and a pail of cold water.

Tenth, the Neapolitan.
The modern business of life insurance is a gradual development of the associations formed by Tenth, a Neapolitan adventurer in 1803. The members of Tenth's associations paid a certain sum of money into a fund, the interest on which was divided annually among the surviving members.

Sandpaper.
The best sandpaper is made from powdered port wine and stout bottles.

Canadian Basters.
The seamen who slip on sailing cruises from Canada get a proportionate share of the work. During the course of a profitable season an ordinary seaman will receive \$1,000 or more as his share.

A Wonderful Rose Tree.
Fremont's hold that the finest rose tree grows in the marine garden at Toronto. It is a Damask rose, which has been known to bear a thousand blossoms at a time. It covers a fifteen foot tree to a width of some eighty feet.

The Red Hat.
The chief insignia of the cardinal's dignity, his red hat, had its original significance from the fact that the wearer was to be at all times ready to shed his blood in martyrdom for the church.

Parian Rugs.
Every district in Persia has its own style and designs of rugs; yet the mere name is no guide to quality; as good and bad rugs are turned out in all districts. The choicest are woven in silk and wool.

Prague English.
For English speaking guests in the Hotel Monopoli at Prague is this sign: "To blow out the electric light, turn the handle." Wine lists are a bawling to the ground floor.

Lead Pipes.
By polishing lead pipes with pumice and a wet rag and then applying white varnish they may be kept bright indefinitely.

Heat Measurement.
A calorie, the unit of measurement, is that quantity of heat required to raise the temperature of one gram of water one degree centigrade.

A Rub For Tannoy.
When Alfred Tannoy appeared in the Oxford theatre to receive his D. C. L. degree it is said that he disheveled hair and wore a disreputable state provoked the undergraduates into greeting him with the inquiry, "Did your mother call you early, call you early, Alfred, dear?"

Parasitic Flowers.
Curious ectoparasites resembling mushrooms grow on trees in Florida and Fargo. These are found to be a parasitic growth, but the "flowers" consist of the inner wood of the tree, which is forced through the bark and assumes various fantastic shapes, often those of the classical arabesque, even on Cortadilla capitals.

New Brunswick Forests.
New Brunswick has about 8,000,000 acres of fir, spruce and pine.

Milk to Let.
English is badly misused at times on the continent of Europe. One sign in Vienna, Italy, reads, "Dinner—Wine Included," and another "Milk For Sale or Let."

London and Fish.
It is estimated that every inhabitant of London eats half a pound of fish daily. The city has its fishing fleet of forty-six vessels, some of which go as far as the coast of Morocco, sixty miles away.

Salmon Skin Leather.
The inhabitants of the eastern coast of the middle of Asia clothe themselves with the tanned skins of the salmon. It is asserted that it makes a leather as tough as wash leather.

The Game and the Candle.
Many expressions now in everyday use have originated among the card tables, and the game has not worth the candle. It is asserted that it makes a leather as tough as wash leather.

For the Children

Boy Horseman Who Took a Long Ride.

Johnnie Watt was ignored. Without Watt's name was said to have been "My country, oh, how I love my country." Watt's name was said to have been "My country, oh, how I love my country." Watt's name was said to have been "My country, oh, how I love my country."

Colors in Cottons.
A good mixture to set color in cotton materials is one tablespoonful of turpentine, a handful of salt and a pail of cold water.

Tenth, the Neapolitan.
The modern business of life insurance is a gradual development of the associations formed by Tenth, a Neapolitan adventurer in 1803. The members of Tenth's associations paid a certain sum of money into a fund, the interest on which was divided annually among the surviving members.

Sandpaper.
The best sandpaper is made from powdered port wine and stout bottles.

Canadian Basters.
The seamen who slip on sailing cruises from Canada get a proportionate share of the work. During the course of a profitable season an ordinary seaman will receive \$1,000 or more as his share.

A Wonderful Rose Tree.
Fremont's hold that the finest rose tree grows in the marine garden at Toronto. It is a Damask rose, which has been known to bear a thousand blossoms at a time. It covers a fifteen foot tree to a width of some eighty feet.

The Red Hat.
The chief insignia of the cardinal's dignity, his red hat, had its original significance from the fact that the wearer was to be at all times ready to shed his blood in martyrdom for the church.

Parian Rugs.
Every district in Persia has its own style and designs of rugs; yet the mere name is no guide to quality; as good and bad rugs are turned out in all districts. The choicest are woven in silk and wool.

Prague English.
For English speaking guests in the Hotel Monopoli at Prague is this sign: "To blow out the electric light, turn the handle." Wine lists are a bawling to the ground floor.

Lead Pipes.
By polishing lead pipes with pumice and a wet rag and then applying white varnish they may be kept bright indefinitely.

Heat Measurement.
A calorie, the unit of measurement, is that quantity of heat required to raise the temperature of one gram of water one degree centigrade.

A Rub For Tannoy.
When Alfred Tannoy appeared in the Oxford theatre to receive his D. C. L. degree it is said that he disheveled hair and wore a disreputable state provoked the undergraduates into greeting him with the inquiry, "Did your mother call you early, call you early, Alfred, dear?"

Parasitic Flowers.
Curious ectoparasites resembling mushrooms grow on trees in Florida and Fargo. These are found to be a parasitic growth, but the "flowers" consist of the inner wood of the tree, which is forced through the bark and assumes various fantastic shapes, often those of the classical arabesque, even on Cortadilla capitals.

New Brunswick Forests.
New Brunswick has about 8,000,000 acres of fir, spruce and pine.

Happenings in and Around Bellevue

J. J. Walter paid a business visit to Landreth on Tuesday.

J. Redfern has sold several fine lots near the lake at Passburg.

J. Wheeler, of Frank, was a business visitor here on Tuesday last.

Phil Hart was down on the prairie Tuesday to bring up some select meat.

J. Callan, proprietor of the Bellevue Hotel, is expected back from Spokane this week.

Joe Forchon, the barber, has moved into the apartments until recently occupied by J. Raynor in the McCutcheon block.

George H. Walter, brother of J. J. Walter, returned to Bellevue from the Orient last week and is spending a few days furlough ere going east.

Hearsemen in a child subject to croup is a sure indication of the approach of the disease. If Chamberlain's Cough Remedy is given at once or even after the cough appears, it will prevent the attack. Contains no poison. Sold by druggists everywhere.

J. Raynor has moved his grocery business from the McCutcheon block to Steve Humble's building, where he will have much more room at his disposal. Mr. Raynor will be in a better position than heretofore to cater to the needs of the public.

The new station is fast donning its covering and the finishing touches are likely to be made within another three weeks. The new structure is just about in keeping with the towns of this district.

It is in these sudden mishap or accident that Chamberlain's Liniment can be relied upon to take the place of the family doctor, who cannot always be found at the moment. Then it is that Chamberlain's Liniment is never found wanting. In cases of sprains, cuts, wounds and bruises Chamberlain's Liniment takes out the soreness and drives away the pain. Sold by druggists everywhere.

First Town Councillors of Coleman

The result of the municipal elections of Coleman, on Wednesday of this week is as follows:

Alex. Cameron, mayor, 179 votes
S. Shone, councillor, 167 votes
J. O. MacDonald " 165 "
Robert Holmes " 151 "
H. W. Clark " 135 "
A. M. Morrison " 116 "
Henry James " 89 "

The following persons also ran:

D. Hyslop, for mayor, 51 votes
T. B. Brandon, councillor, 81
W. Evans " 77
F. Steele " 72
John Vuori " 45

Alex. Cameron received a majority of 128 votes over his opponent, D. Hyslop. This is a proof of Mr. Cameron's ability as a manager of municipal affairs and plainly shows that the good people of Coleman greatly appreciate the immense good that he has done them.

BURMIS IS BUSY PLACE THESE DAYS

Erecting Many Buildings, Installing Much Machinery and Making Many other Improvements

TOWNSITE IS ON THE MARKET

Davenport Coal Co. Own and Operate Extensive and Valuable Coal Areas

Many who seen Burmis four months ago may have little thought that by this time it would become a busy mining town.

To be convinced that Burmis is quickly becoming an important place, one has only to take a glance around that new town where they will see good coal property being extensively developed, new mine buildings being erected, mining machinery being installed, side tracks being laid for the accommodation of coal cars, dwelling houses being built and business places being established.

Burmis is nine miles east of Blairmore and six miles east of Bellevue. In June last the Davenport Coal Co. made their first shipment of black diamonds from Burmis, and ever since then their daily output has steadily increased until now they ship two hundred tons of high-grade coal per day.

The demand for this coal is great (which says much for its good quality) but most of the shipments at present are confined to Spokane and Calgary.

The Davenport Coal Co. have four good workable seams of coal on their Burmis property. These seams average seven feet in width. At the present time only two seams are being worked but the whole four will be operated in the near future when more cars are obtainable. At No. 2 seam they are in 900 feet and are in 750 feet at No. 5 seam. The latter seam is nine feet thick and through this seam the main haulage way is being constructed. James Darbyshire is mine manager and is taking good care to have the mines kept in a safe condition and thus prevent any mishaps to the miners. Messrs Woods and Steele, Dominion land surveyors, have just completed surveying townsite of Burmis. Good business as well as residential lots are now on the market and many have already been sold.

A contract for the erection of ten miners' cottages has been let to E. Disney, of Coleman, and work on those buildings will commence immediately.

Orders have been placed for fans, boilers and engines and they are expected to arrive at Burmis any day. This machinery will be installed soon after it arrives. Burmis promises to become a

Happenings in and Around Frank

A. Manuel left on Sunday last to attend the Dry Farming Congress at Spokane.

A fine horse belonging to T. Wright dropped dead on the side Saturday.

Several of our local marksmen returned from the chicken grounds on Wednesday with big rewards.

SOMERTON BROS. sell good alarm clocks for 55 cents each.

Many nice dwelling houses are being built here and the town is assuming a prosperous appearance.

Miss B. Chatfield, of Martin, McNeil and Moore's office, leaves today for a short visit to her sister, Mrs. C. L. Bambrick, at Calgary.

You will save money if you buy your watch at SOMERTON BROS.

Isaac Beresford, formerly manager of the Sanatorium Hotel, has gone to British Columbia, and Harry Hudson, of Blairmore, is the new manager.

E. W. Welsh has opened up a bakery on Main street and is serving many of the people of this place with good bread, cake, pies, etc.

In a few days we will receive another parcel of Diamonds, come and see them, at SOMERTON BROS.

W. T. Eddy, of Cowley, was in town on Tuesday. Mr. Eddy was exhibiting samples of his wheat, which are said to surpass in quality even that of last year.

A conductor on one of the freight trains got badly hurt last week by being knocked off a moving engine near Bellevue. He was taken to the hospital here and is now on the road to recovery.

For first class work on Watches and Jewelry go to SOMERTON BROS. Frank and Michel. An extensive supply of materials for all makes of watches kept on hand thus avoiding delay. Send your watch by mail and it will receive most careful attention.

prosperous place and will be an addition to the already many progressive towns in the Pass.

The attention of persons wishing to establish a business for themselves should be directed towards Burmis. There are good openings at Burmis for a general store, butcher shop, barber shop, hotel, laundry, jewelry store, bakery, bank, etc.

E. T. Fitzsimmons, who was for some time connected with the Leitch Collieries and who has a thorough knowledge of the workings and management of a coal mine—being associated with the general work of a coal mine ever since he was a boy—is general manager of the Davenport Coal Co. Those who are interested in the Davenport Coal Company might well predict a prosperous future for it under the management of Mr. Fitzsimmons.
